ABOUT US

Dexovit International Private Limited is a leading Complete Bathroom Solutions- Goods (CBSG) Company and a major power distribution of Goods with a strong pan India presence. Dexovit enjoys enviable market dominance across a wide spectrum of products, including Sanitaryware-Faucets-Eco Accessoriers-Bath Accessories-Cpvc Piping Solutions-Agriculture Piping Solutions-Illuminated Mirrors-Kitchen Appliances-Cleaners and Fillers and much more.

‘Today, Dexovit owns some of the most prestigious brandvalue for its quality products. Its network constitutes of 2000 professionals, over 1000 dealers and 4 branches across the country. Its Warehouse is Located in Derabassi and Ludhina(PB) are distributing globally acclaimed products, synonymous with excellence and precision in the bath industry.

Expert In All Aspects.

IPX4
rating

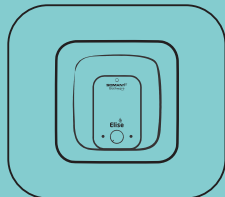

Our water heaters are splash proof with IPX4 rating, giving it one more reason to serve you longer.

A 5 star rated product, which means less energy consumption, more savings.

Our water heater can withstand pressure up to 8 bars, which make this the perfect match for your high rise apartment.

Compact & premium design that bring art to your modern bathing space.

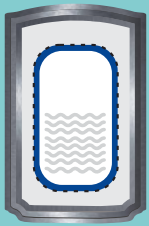

WHY Dexovit WATER HEATERS ?

Water Heaters that give you more.

At Dexovit we believe in creating technology that makes a difference and our products aim at making your life easier and more comfortable. This philosophy is what makes our products the best-in-class compared to the many others in the market.

You should not be made to choose between convenience and performance. This is why our Water Heaters come equipped with temperature sensitive color changing LED indicators and an 'Incoloy 800' glass coated heating element which ensures superior performance and convenience to you.

These innovative features, which are designed keeping you in mind, ensure that Dexovit Water Heaters never come up short. Equipped with India's first integrated shock safe plug that cuts power in case of any current leakage along with superior Feroglas technology, that protects the inner tank of your Water Heaters from corrosion and rust. We believe our products are the right choice for all your needs.

INNER TANK - Blue sapphire enamel coating

Our inner tank is made from extra thick super cold rolled steel with an **extra thick layer of blue sapphire enamel coating** which makes the inner tank more durable & corrosion resistant. Enabling them to withstand pressure even as high as 8 bar.

HEATING ELEMENT - Triple Shield Technology

The heart of every water heater is the heating element and at Somany we understand this better than others and ensure this with **Triple Shield Technology**

1. Our heating element is made of superior thermal efficient Incoloy 800 high grade element which ensure long life & better resistance to hard water.
2. The extra layer of Blue sapphire enamel coating protects the Heating element from scale formation.
3. Integrated with smart guard resistor Mg anode rod that helps achieve super

durability

by protecting against corrosion.

SMART GUARD resistor Mg anode rod

A resistor magnesium anode rod is placed just next to the heating element which act as an smart guard , it get into action with water rushing inside the tank and starts an electrolytic process that protect the heating element from the impurities in the water. Because of this the life span of the heating element is increased twice compared to a regular magnesium anode rod.

PUF Insulation (Eco friendly)

Insulation is the Thickness between Outer & Inner tank in a Water heater.

In Somany water heaters the foam (PUF) is injected uniformly between 2 layers with zero gaps to avoid Heat loss and keeps water Hot for a longer period of time.

It helps save energy & ensure faster heating. The PUF Insulation used in our water heater is CFC Free which means it is Environment friendly as well.

5 in 1 Multi Functional safety valve

The safety valve is designed to automatically relieve pressure and discharge water in case the pressure overshoots the preset limits. It perform 5 key functions i.e. Pressure release function, Non Return function, Drain Function, Expansion Function & Vacuum release function.

High on Safety

Your safety is our first priority. Our wide range of water heaters comes with insulated body and it features a **Thermostat & a Pre Set Thermal cut out** to ensure that you get all the hot water you need without compromising on safety. Also equipped with **high precision capillary thermostat** which monitor the inside temperature exactly between 25-75 °C.
